- Connection M22x1 internal thread for fittings with external thread or connection M24x1 external thread for fittings with internal thread

Article text

The RCM Neostrahl Clinic Color is a hygiene aerator specially designed for hospitals and care facilities.

It is available in four different colours and, thanks to this four-colour concept, enables regular and controlled replacement of the aerators on your taps.

Due to its design, it does not suck in air, which produces a clear laminar jet and results in less splash water and aerosol formation.

Suitable for taps on unpressurised water heaters without pressure relief valve.

Certificates: DVGW, W270

Material: CW614N, POM, EPDM

Surface: chrome

Weight: 14 gram / 15 gram

Dimensions: 20 x 17mm

Connections: Internal thread M22 or

External thread M24
