Product: RCM Neostrahl

RC Mannesmann

SAVE YOUR BLUE.

STD

LP

Description

- The aerators provide a crystal clear laminar jet
- Connection M22x1 female thread for fittings with male thread or M24x1 for fittings with female thread

Article text

RCM Neostrahl STD:

This classic jet regulator is suitable for faucets connected to pressureless water heaters with pressure relief valve.

RCM Neostrahl LP:

Thanks to the standardized crown, it is not possible to squeeze the aerator, which prevents overpressurization of the storage tank. Suitable for fittings on non-pressurized water heaters without pressure relief valve.

RCM Neostrahl LP Dripless:

This jet regulator prevents the faucet from running empty and ensures pressure release when the storage tank is heated. Suitable for fittings on pressureless water heaters without pressure relief valve.

Connection M22x1 female thread or M24x1 male thread for all common fittings.

LP Dripless

Material: CW614N, POM, EPDM

Surface: chrome

Weight: 14 gram

Dimensions: IG 23 x 17mm / AG 24 x 15 mm

Connections: IG M22 or AG M24
