

Product data sheet

Product: RCM profi HOS

RC Mannesmann

SAVE YOUR BLUE.

Description

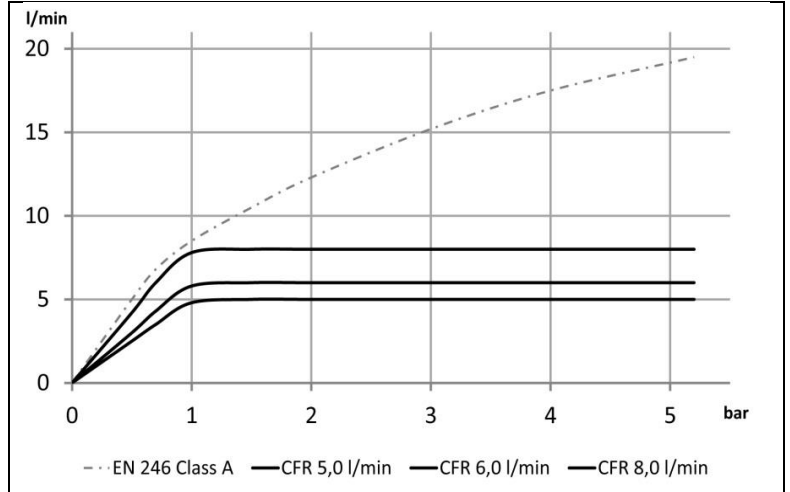

- Improved lime resistance because of the atomic structure
- Longer life period of the aerator
- Perfect stream quality even under difficult flow conditions
- Damage proof: the atomic structure cannot be crushed
- Crystal clear water stream
- Spray free water stream without aerosol formation
- With integrated constant flow regulator in 5,0 L/min, 6,0 L/min, 8,0 L/min
- Connection M22x1 internal thread for fittings with external thread or M24x1 external thread for fittings with internal thread

Article text

The RCM profi HOS aerator generates a crystal clear, spray-free water stream without air suction, making it especially suitable for the clinical area. Therefore the spread of wetgerms gets minimised.

Also it can not be crushed because of the atomic structure.

This aerator is suitable for washbasin and kitchen faucets.

Material: CW614N, POM, EPDM

Surface: chromed

Weight: 26 - 28 Gramm

Dimensions: 24 x 25mm

Connection: IG M22 oder AG M24
